

## NOTE:

40 channels with a usable bandwidth of 36 MHz (Channels A1 to A12, C1 to C12, D1 to D9 and D11 and H1 to H6)1 channel with a usable bandwidth of 49.5 MHz (Channel D10)
15 channels with a usable bandwidth of 72 MHz (Channels B1 to B6, F1 to F6 and G1 to G3)
2 channels with a usable bandwidth of 108 MHz (Channels J1 to J2)

## Satellite Characteristics

|  | Parameter | Values |
| :---: | :---: | :---: |
|  | Satellite Manufacturer | Astrium |
|  | Launch Date | 16/03/2004 |
|  | Launch | Proton |
|  | Projected Lifetime | $>12$ years |
|  | Orbital Position | $7^{\circ}$ East |
|  | Operational Transponders | 44 |
| $\begin{aligned} & \text { E } \\ & \text { N } \\ & \text { N } \\ & \text { N } \\ & 0 \end{aligned}$ | Polarization | Dual linear Horizontal (X) and Vertical (Y) |
|  | Polarization Discrimination | 30 to 34 dB |
|  | Typical Operational Saturation IPFD Range ${ }^{\text {a }}$ | $\begin{gathered} -(86+X) \text { to }-(77+X)^{b} \\ -(100+X) \text { to }-(80+X)^{\text {c }} \end{gathered}$ |
|  | Beacon 1: Frequency | $\begin{gathered} 11699.80 \mathrm{MHz} \text { or } \\ 11700.4 \mathrm{MHz} \end{gathered}$ |
|  | Beacon 2: Frequency | 12500.50 MHz |
|  | Beacon 3: Frequency | 11200.00 MHz |
|  | Beacon 4: Ka Frequency | 21404.0 MHz |
|  | Minimum EIRP | B1: 7.0 dBW, Widebeam <br> B2 \& B3: 8.0 dBW Global Coverage <br> B4: 9.0 dBW , Widebeam coverage |
|  | Polarization | Horizontal (X) |

a) In $\mathrm{dBW} / \mathrm{m}^{2}$. X is the $\mathrm{G} / \mathrm{T}$ in $\mathrm{dB} / \mathrm{K}$ in the direction of the location considered.
b) In Fixed Gain Mode (FGM).
c) With Automatic Level Control (ALC).

European A Uplink Coverage
